Education

National School of Electronics and Telecommunications of Sfax (ENET'COM) **2022 – 2025**
Engineering Degree in Telecommunications

Preparatory Institute for Engineering Studies of Monastir (IPEIM) **2020 – 2022**
Preparatory Cycle in Physics and Chemistry

Experience

Full-Stack Developer at Majradeep — July 2025 – Present

- Designed and developed *Le Transfert*, a multi-application private taxi platform operating across Europe and Tunisia, using a microservices architecture with Spring Boot and Angular.
- Developed dedicated applications for clients, companies, drivers, and administrators, covering trip reservations, driver and fleet management, verification and admission workflows, and client–driver messaging.
- Designed and implemented a microservices-based backend with asynchronous communication using Apache Kafka and supporting infrastructure using Redis and Docker.
- Implemented payment workflows using Stripe for European operations and a dedicated payment system for Tunisia, with authentication and authorization managed through Keycloak.
- Integrated Mapbox for map visualization, route management, and location-based services, and deployed the application infrastructure using Proxmox and Docker Desktop.
- **Technologies:** Angular, Spring Boot, Microservices, Kafka, Docker, Keycloak, Redis, Mapbox, Stripe, Proxmox , Traefik.

Intern in Web Development and AI at Decade — Feb – May 2025

- Developed and deployed AI-driven merchandising and recommendation modules for Salesforce Commerce Cloud (SFCC) based on customer segmentation, integrated through FastAPI and SFCC jobs.
- Implemented continuous performance monitoring using Grafana and Prometheus to track application and service performance.
- **Technologies:** SFCC, JavaScript, Python, Machine Learning, FastAPI, Docker, Ngrok, Grafana, Prometheus.

Part-time Developer and DevOps at GETS Company — Oct 2024 – Jan 2025

- Developed and maintained an ERP platform, implementing new features and system enhancements.
- Managed CI/CD pipelines to automate build, testing, and deployment workflows, while collaborating on feature integration and code reviews.
- **Technologies:** Next.js, Spring Boot, Docker, Jenkins, GitLab, Jira.

Web Development and DevOps Intern at GETS Company — June – Aug 2024

- Developed a role-based Leave Management module for an ERP system, including request workflows, approvals, notifications, and history tracking.
- Implemented backend services with Spring Boot and MySQL and contributed to CI/CD pipelines and containerization to streamline deployments.
- **Technologies:** Next.js, JavaScript, Spring Boot, MySQL, Docker, GitLab, Jenkins, Jira, Postman.

Web Development Intern at Aures Konnect — Aug 2023

- Developed a full-stack task management application with user authentication, personalized dashboards, and RESTful APIs backed by PostgreSQL.
- Containerized the application using Docker to streamline deployment and improve application scalability.
- **Technologies:** React.js, Node.js, Express.js, PostgreSQL, Docker.

Projects

Advanced Traffic Management in Kubernetes with Traefik **End-of-Year Project**

- Deployed a full-stack application on a Kubernetes cluster and implemented traffic management using Traefik as a reverse proxy, including SSL/TLS configuration for secure communication.
- **Technologies:** Kubernetes, Traefik, Docker, GitLab, VirtualBox.

Orchestration of Data Pipelines with MWAA

- Automated scalable ETL data pipelines using Amazon MWAA and Apache Airflow, integrating AWS services for data storage, processing, and database management.
- **Technologies:** Amazon MWAA, S3, IAM, Boto3, RDS, Apache Airflow, EC2, Linux.

Full-Stack Food Delivery Web Application

- Developed a full-stack food delivery platform featuring authentication, cart management, order tracking, PayPal payments, and map-based delivery location selection.
- Built a responsive frontend with Angular and RxJS and implemented RESTful APIs using Node.js and Express.js with MongoDB.
- Containerized and deployed the application on a Kubernetes cluster using Minikube to improve scalability and reliability.
- **Technologies:** Angular 18+, RxJS, Node.js, Express.js, MongoDB, Docker, Kubernetes (Minikube).

Technical Skills

Programming Languages: Java, JavaScript/TypeScript, Python, Bash

Frontend: Angular, React.js, Next.js, HTML, CSS, Bootstrap, RxJS

Backend: Spring Boot, Node.js, Express.js, REST APIs, Microservices

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis

Cloud & Infrastructure: AWS, Azure, Terraform, Kubernetes, Docker, Proxmox, Vagrant

DevOps & Tools: Jenkins, Git, GitHub, GitLab, Jira, Kafka

Testing & API Tools: JUnit, Jest, Postman

Security & Integration: Keycloak, Stripe, Mapbox

Systems: Ubuntu (Linux), Windows

Certifications: AZ-900 (Microsoft Azure Fundamentals), CCNA (Cisco), Introduction to DevOps (IBM), Introduction to Containers: Docker, Kubernetes, and OpenShift, AWS Cloud Practitioner Essentials, Spring Boot Certification (CrocoCoder)

Language Skills

- **Arabic:** Native **French:** Fluent **English:** Fluent **German:** Beginner
